DETAILED ACTION

Response to Amendment

1. Applicant's reply, filed 16 January 2007, has been received and entered. Accordingly, claims 32, 35, 38, and 40 have been amended. Claims 1-31 have been cancelled. No new claims have been added. Thus, claims 32-40 are currently pending in this application.
2. Applicant's amendment of the claims has successfully overcome the objections to claims 38 and 40, as detailed in paragraph 2 of the previous Office action.

Allowable Subject Matter

3. Claims 32-40 are allowed.
4. The following is an examiner's statement of reasons for allowance: The reasons for allowance for claims 32-40 have been previously communicated in the Office action mailed 18 October 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsamis et al. (US Patent Application # 2004/0195096) has a common inventor with the present application and was filed after the foreign priority date for the present application. Tsamis et al. teach a different silicon processing method for microchannel formation with a porous silicon layer. Further, Tsamis et al. teach similar device configurations using a porous silicon layer as recited in claims 39 and 40, but fail to address the use of a heater with first and second thermocouples or resistors, a passivation layer, and inlet/outlet regions for the microchannel.

Isaka et al. (US Patent # 5,482,598) teach a prior art method of forming a microchannel using porous silicon wherein a high temperature treatment is used to form the microchannel rather than a change in current density.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick F. Rosenberger whose telephone number is 571-272-6107. The examiner can normally be reached on Monday - Friday with flexible hours.
